HOT FOOT ELECTRACK BIRD DETERRENT PROTECTS HOMEOWNERS' ROOFS FROM MESSY PIGEONS

Hot Foot offers several different bird deterrent options to address various nuisance bird problems. In this case study, we provide two different examples of how Hot Foot's Electrack bird repellent system helped remove roosting pigeons permanently, without ever harming the birds.

[VIEW CASE STUDY](#)

POND PROTECTION

Researchers were losing too many fish in their study to hungry cormorants, swooping in for a free meal. Read how Hot Foot custom-designed a system to reduce the number of fish lost to cormorants down to zero - plus found a new use for this versatile netting.

BUSY RAIL SHED BUSY WITH BIRDS, TOO

A rail shed used to unload food products was also a busy area for various species of birds roosting and nesting in the girders above - and causing a mess below. Read how Hot Foot custom-designed a system to "spot enclose" roosting areas without interfering with workers.

HOT FOOT BIRD REPELLENTS AND BIRD GELS - FOR YOUR HOME

Sometimes our fine, feathered friends are not that friendly at all. Pest birds can cause serious destruction to buildings and property like your eaves, garage, and roof. Roofing contractors frequently report that pigeon droppings are responsible for a large percentage of roof leaks. Their droppings also pose a serious health risk to people, especially children.

Hot Foot Bird Repellents provides a variety of safe, effective, and environmentally friendly methods to get rid of pest birds, and keep them away for good. From easy do-it-yourself options like repellent bird gel and Hot Foot Bird Spikes to professional-grade solutions, Hot Foot America is one of the most reliable and effective suppliers in the United States and has been in business since 1977.

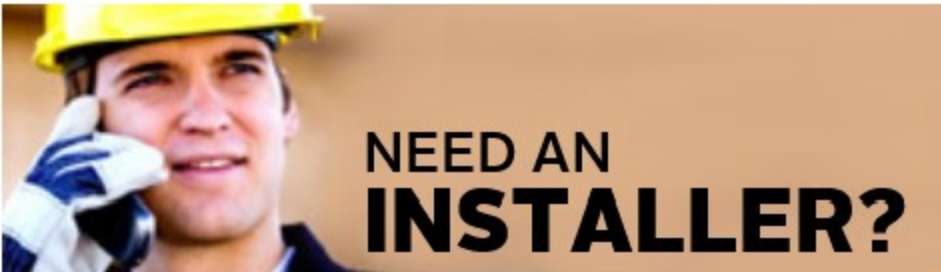

Plus, we help you at every step. During a free phone consultation, we can help you decide what bird deterrents will work best for your situation, help you plan and calculate your materials, and give you advice and tips about installing your deterrents. If needed, we can also help you find professional installers in your area who will make sure it's done right.

HOT FOOT BIRD CONTROL SYSTEMS & METHODS

HOT FOOT REPELLENT BIRD GEL

Sticky goo that birds hate stepping in – like mud in boots! Great for DIY and professional solutions. Does not harm birds.

HOT FOOT INVISINET EXCLUSION NETTING

Literally a barrier between birds and their roosting areas. Strong, weather resistant, and near invisible to keep your building beautiful.

HOT FOOT RITE SPIKES

Stainless steel spikes that protect natural roosting areas from pigeons and gulls. Low profile and weather resistant.

ELECTRACK™ ELECTRIC SHOCK

Very low amperage, low visibility bird repelling system with a flexible track. Solar, 110 volt and 240 volt power supplies are available.

HOT FOOT SPRINGWIRE

Spring-loaded cable system that creates an unstable landing spot for larger birds, forcing them to roost elsewhere.

HOT FOOT MIST NETS

Hot Foot Mist Nets allows you to safely capture and release pest birds in enclosed areas without injuring them.

HOT FOOT BIRD TRAPS

Capture and relocate pest birds from any area safely and humanely, inside or outside. Ideal for rooftops and other open areas.

HOT FOOT BIRD AND BUG SCREENS

Keep birds and bugs out, but let employees and equipment pass through easily. Innovative, customized solutions for any size doorway from locker to hanger.

HOT FOOT ADHESIVES

Allows you to install and affix many Hot Foot products to any material including stone, brick, wood, and concrete.

HOT FOOT DISINFECTANTS

Birds spread disease to humans through their droppings. Eliminate the problem before you start your cleanup with Hot Foot disinfectants.
